THE STRATEGY RELIGION

All you have to do is to want to be good.

Prophet Scott said – "You must be pure of heart. Your best and vital defence is your conscience (see Henry The 5th – William Shakespear). If your heart is not pure you will destroy yourself. A bad conscience will make you indefensible". In the movie "A Few Good Men" the man said "God, Nation, Platoon".

This is an elite religion, it's not for everyone. It's like shaolin or the SAS. We are the 'go to' people for other religions, so you can be in them too, simultaneously. And yes, you do get an afterlife, as long as you are not evil.

HOW TO JOIN

- Read 2 books from your nearest university textbook list on strategy, but ideally not military strategy, because Sun TZU (sensei / god) said approximately "the most important fight is the one you avoid, whereas Prophet Scott said "If you go to war, your strategy has failed you".
- Preferably own a copy but read briefly or initially flip through "The Art Of War" (Sun Tzu). You may want to have it to look at later in your life, but it is important because it is our history. Its sort of symbolic, but importantly pays homage to our sensei. It's good to be able to have an unchanging book (document) that DOES NOT change over time. It's an accomplishment to be valued to be able to keep it unchanged.
- If you can get it, have a read through "Scott Stewarts Surviving Schizophrenia Story" (aka The Anthology Of Evil) because it demonstrates phenomenology (not noumenal) that should be understood when working with higher order (invisible) forms of people (life).

Then – write in your own words, what you think about The Strategy Religion, a paragraph or two or more. You must respect referencing in this summary, and no plagiarism (or you won't be accepted).

Then – you must publish publicly your summary with exact compliance with your jurisdictions Intellectual Property law. (so copyright it and so on). It must stay published for 1 Julian calendar month at least (but it doesn't have to be indexed etc or able to be found by humans on the Internet).

THEN – you will receive notification perceptively ('audibly') or written hard copy notification (email) notifying you that you're in!
